

# Jobs and Places of Work Matching Cards

Grab these matching cards and use them in multiple ways to engage young students in learning about community helpers. Ideas include:

- Print multiple copies and play traditional snap or memory.
- Play memory or snap with a twist - matching the profession to the place of work.
- Hide the cards in a sensory tray with sand, rice, pasta or other sensory materials for students to find and match.
- Create a treasure hunt match-up, hide one half of the cards around your setting and give students the remaining cards. Students then hunt for and collect the cards that match the ones they have been given.
